SUMMARY

Software Development Engineer experienced in Flutter, MERN stack, and scalable backend systems. Built end-to-end applications, including cross platform mobile apps and full stack web solutions. Worked with cloud services (AWS, Google Cloud, Firebase), authentication systems, AI driven features, and payment integrations. Strong problem solving skills with a focus on building user friendly and high performance applications.

EXPERIENCE

Software Development Engineer (Flutter) Intern Feb 2026 - Apr 2026

Onit India (Startup), IIIT Delhi Google Play store links : ONIT INDIA , ONIT INDIA PERFORMER

- Built two cross-platform mobile applications (Task Provider & Task Performer) using Flutter and Dart .
- Developed intuitive and user-friendly UI/UX, ensuring smooth navigation and seamless user experience.
- Integrated backend services using AWS, enabling scalable and efficient data handling.
- Implemented secure authentication system and role based access for different user types.
- Integrated Razorpay payment gateway for handling in-app transactions.
- Managed development including frontend, API integration, and deployment in a hybrid work environment.

Full Stack Developer Intern Jul 2025 - Aug 2025

Ingraham Institute Degree College, Ghaziabad

- Built a full stack college website using MERN stack with a modern UI and seamless frontend backend integration.
- Enabled faculty friendly content management for easy updates and maintenance.
- Handled end-to-end development, including UI design, API integration, and database management.

PROJECTS

Clario | *Flutter, Dart, Firebase Auth, Google Cloud Platform , Mobile UI/UX Design* APK Link Demo Link

- Developed a cross-platform mobile application using Flutter with scalable and responsive UI/UX.
- Integrated Google Authentication and managed secure user sessions.
- Built a multilingual AI chatbot with persistent chat history for personalized user experience.
- Designed dynamic UI components including mood-based avatars and journaling dashboard.
- Connected Flutter frontend with Cloud Run backend and AI APIs, handling async data flow.
- Implemented journaling, relationship mapping, and wellness features with optimized performance and state management.

Spend Smart | *React.js, Node.js, Express.js, MongoDB, Bootstrap, Tesseract.js* Link

- Developed and deployed a full-stack web app for managing personal and shared expenses.
- Integrated Tesseract.js OCR to extract and auto-categorize data from scanned bills.
- Built a real-time dashboard to track payment statuses: Due, Paid, and Owed.
- Designed visual analytics for better financial insights and expense patterns.
- Handled both frontend and backend with a focus on clean architecture.
- Implemented friend system and smart expense splitting with contribution tracking.

TECHNICAL SKILLS

Programming Languages: JavaScript, C++, Python
Mobile App Development: Flutter (Dart), Cross-platform UI Development
Web Development: React.js, Next.js, MERN Stack, HTML, CSS, Bootstrap, Tailwind CSS
Backend Technologies: Node.js, Express.js, MongoDB, REST APIs, Postman , Firebase (Auth, Firestore, Cloud Messaging), Google Cloud Console Integration ,AWS, Auth0

EDUCATION

Dr. Akhilesh Das Gupta Institute of Professional Studies | GGSIPU, New Delhi

Bachelor of Technology (B.tech) Computer Science | 2023 – 2027 | Current CGPA: 9.1

HONORS AND AWARDS

Achievements: Finalist at **Google Cloud Exchange Hackathon 2025** (**Top 10** in Youth Mental Wellness), developed a full stack Flutter + Firebase + Google Cloud app recognized among **185,000+ teams.**
Hackathons: Shortlisted in Top teams in 6 hackathons, delivering multiple end-to-end projects from ideation to deployment.
LeetCode: Solved **200+** problems
