LOVE MAGGO

Software Development Engineer | Flutter & MERN Stack Developer

+91 93155 34818 | lovemaggo3605@gmail.com | lovemaggo.com | linkedin.com/in/lovemaggo | github.com/Love-M-365 | leetcode.com/u/loveM

SUMMARY

Software Development Engineer with hands on experience building full stack web applications (MERN) and cross-platform mobile apps (Flutter/Dart). Delivered production apps integrating AWS, Firebase, Google Cloud, OCR (Tesseract.js), AI APIs, and Razorpay payments. Top 10 finalist among 185,000+ teams at Google Cloud Exchange Hackathon 2025; shortlisted in top teams across 6 hackathons. Solved 300+ problems on LeetCode with strong foundations in JavaScript, C++, and Python.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C++, Python
Mobile Development: Flutter, Dart, Cross-platform UI Development
Web Development: React.js, Next.js, MERN Stack, HTML, CSS, Bootstrap, Tailwind CSS
Backend & Databases: Node.js, Express.js, MongoDB, REST APIs, Postman
Cloud & DevOps: Google Cloud Platform (GCP), AWS, Firebase (Auth, Firestore, Cloud Messaging), Auth0
Developer Tools: Git, GitHub, Linux, Unix Shell Scripting

EXPERIENCE

Software Developer Intern **July 2026 – Present**
CausalFunnel Global Inc., San Francisco, California | Remote

- Developing scalable web applications using **JavaScript, Python, MongoDB, and Google Cloud Platform (GCP)**.
- Building and customizing **Shopify** and **WordPress** solutions through feature development, API integrations, and theme customization.
- Developing production-ready features while debugging, testing, and optimizing application performance.
- Collaborating with cross-functional engineering teams using Git-based development workflows.
- Writing clean, maintainable, and scalable code following software engineering best practices.

Software Development Engineer (Flutter) Intern **Feb 2026 – June 2026**
Onit India (Startup), IIIT Delhi | Hybrid | Play Store Link: ONIT INDIA

- Engineered two cross-platform mobile applications (Task Provider and Task Performer) using **Flutter** and **Dart**, supporting role-based workflows for two distinct user types.
- Designed intuitive UI/UX flows that streamlined task assignment and tracking, improving navigation and overall user experience.
- Integrated AWS backend services to enable scalable, efficient data handling across both applications.
- Implemented secure authentication and role-based access control (RBAC) for differentiated user permissions.
- Integrated **Razorpay** payment gateway to support secure in-app transactions.
- Owned end-to-end delivery including frontend development, API integration, and deployment in a hybrid work environment.

Full Stack Developer Intern **Jul 2025 – Aug 2025**
Ingraham Institute Degree College, Ghaziabad | Hybrid

- Architected and deployed a full-stack college website using the MERN stack with a modern UI and seamless frontend-backend integration.
- Built a faculty-friendly content management system, reducing time required for routine content updates.
- Managed end-to-end development including UI design, REST API integration, and database schema management.

PROJECTS

Clario | *Flutter, Dart, Firebase Auth, Google Cloud Platform, Mobile UI/UX Design*
Links: APK | GitHub | Demo

- Built a cross-platform mental wellness mobile app in Flutter with a scalable, responsive UI/UX; recognized as a Top 10 finalist among 185,000+ teams at Google Cloud Exchange Hackathon 2025.
- Integrated Google Authentication to manage secure user sessions.
- Developed a multilingual AI chatbot with persistent chat history for personalized user experience.
- Designed dynamic UI components, including mood-based avatars and a journaling dashboard.
- Connected the Flutter frontend to a Cloud Run backend and AI APIs, handling asynchronous data flow with optimized state management.
- Implemented journaling, relationship mapping, and wellness-tracking features with optimized performance

SecondMind | *React , Vite, Express, Node.js, MongoDB, Google Gemini AI, MCP, Firebase Auth*
Links: GitHub | Demo

- Built a full-stack personal AI memory layer and digital twin platform powered by Google Gemini to parse, index, and synthesize developer notes and documents.
- Created a multi-agent orchestration pipeline for automated cognitive persona synthesis, weekly schedule planning, and grounded vector search.
- Implemented a predictive simulation engine generating 3-phase career roadmap timelines, feasibility scoring, and curated learning syllabi.
- Exposed user profile data and memory retrieval tools via standard Model Context Protocol (MCP) server endpoints for integration with IDEs and AI assistants.

Spend Smart | *React.js, Node.js, Express.js, MongoDB, Bootstrap, Tesseract.js*
Links: GitHub

- Developed and deployed a full-stack MERN application for managing personal and shared expenses.
- Integrated Tesseract.js OCR to automatically extract and categorize data from scanned bills, reducing manual data entry.
- Built a real-time dashboard to track payment statuses (Due, Paid, Owed) across users.
- Designed visual analytics to surface expense patterns and financial insights.
- Implemented a friend system with smart expense-splitting and contribution tracking.
- Architected both frontend and backend with a focus on clean, maintainable code structure.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science **2023 – 2027**
Dr. Akhilesh Das Gupta Institute of Professional Studies, GGSIPU, New Delhi | Current CGPA: 9.1

HONORS & AWARDS

- Top 10 finalist (Youth Mental Wellness track) at Google Cloud Exchange Hackathon 2025 among 185,000+ teams, for a full-stack Flutter + Firebase + Google Cloud application.
- Shortlisted in the top teams across 6 hackathons, delivering multiple end-to-end projects from ideation to deployment.
- Solved 30+ problems on LeetCode
